

SOLIDARITY ECONOMICS

1 WORLD IN WHICH MANY WORLDS THRIVE

RETHINK, FIGHT, BUILD

Cynthia Kaufman

Sothe LZA

FUTURE?

One in which we are ALL living ~ well ~

In good relationship with each other and with the ENVIRONMENT

how do we get to a post-capitalist future?

that future is already here - it's also in the past - if we just listen and tap into it

EVERYTHING TO change start ANYWHERE

ZAPATISTA SLOGAN

SOLIDARITY

is built on the idea that we are best off when...

We acknowledge the ways we are interdependent with each other and with the NATURAL WORLD

we ATTEND to the nature of these interdependencies

we try to make them healthy and LIFE AFFIRMING

To get to a world of solidarity, we must

RETHINK our ideas of how to live well

FIGHT against entrenched powers

BUILD the new world together

RETHINK

Our current political and economic world is built on ENLIGHTENMENT ideas from hundreds of years ago, and have been used to justify the exploitative system of CAPITALISM

Research on human psychology, natural ecosystems, feminism, and indigenous economics all point to new ideas:

OLD humans are selfish

NEW humans are social and care about each other

nature should be exploited

we are a part of nature and thrive when our environment thrives

resources are scarce

there is enough for everyone to live well

FIGHT

to create space for the new ideas, we must FIGHT the power of coercive systems...

BUILD

scale up existing solidarity projects

co-ops

time banks

mutual aid networks

community gardens

public housing

REVOLUTIONARY REFORM:

transform existing systems in the present to create deep and lasting change for the future

...by gaining independence from these systems

This will require struggle

And each step we take will improve our lives

land reparations

restorative justice

wealth tax

reduce corporate power

defund military

queer liberation

reproductive rights

education, healthcare, transportation, housing

guaranteed basic needs

rematriation
